

Best Montessori Curriculum

montessori sanctuary

An oasis of learning where children can discover their potential through fun-filled activities.

Since 1999, Little Kinder Montessori has been providing children with high quality Montessori education with an aim of helping parents raise global citizens with a love for learning. They pride themselves in creating a bright and exciting learning environment to stimulate learning at its best. The teachers at Little Kinder Montessori live and breathe the Montessori motto of “following the child” and hence is able to effectively cater to every child’s unique learning styles.

Through delivering a strong Montessori foundation in the five core Montessori areas – Language, Math, Sensorial, Practical Life and Cultural – the children learn to develop skills and good work habits; build up their confidence and independence. These skills, when developed early, allow the children to believe in their own abilities and have the self-discipline required for success throughout their lives. With their highly diverse

student body, the school promotes teamwork, mutual respect and a global perspective.

Little Kinder Montessori also offers their very own Little Beanstalk Program – which is an in-house blend of specially curated enrichments aimed at letting their children unlock their inner talents and interests.

At Little Kinder Montessori, there is a focus on balancing between work and play because learning is not confined to the classroom. Natural science, field trips and outdoor fun is an important element in expanding the children’s educational horizons. In addition, they also believe in collaboration with families and community partners to learn and work on projects. Being a part of Little Kinder Montessori is like being in a warm and supportive learning network of children, teachers and parents. Most importantly, your child will grow up in a safe, stimulating and fun-filled environment.
